MEMORANDUM FOR: Director of Central Intelligence

SUBJECT : Forecast of NRP Activities for February 1969

1. This is a briefing memorandum on the NRP Forecast for February which was unavailable when the JRC Reconnaissance Schedule Book was reviewed earlier. The Forecast covers the satellite and aircraft programs under the NRP.

2. The February NRP Forecast lists the launch of one photo-reconnaissance satellite (KH-4B Mission 1106--5 February). SAC U-2, SR-71 and drone mission estimates remain as reported and approved in the basic JRC Schedule Book for February.

3. The Forecast continues to request U-2 photo and ELINT overflight of China. If the 303 Committee disapproves overflight as it has since early last year, the NRO proposes that four U-2 photo/ELINT missions be flown 20 miles off the China mainland.

If IDEALIST/TACKLE missions are approved for February, they will be flown using these aircraft.

4. I recommend that you approve the NRP Forecast.

EDWARD W. PROCTOR

Assistant Deputy Director for Intelligence
